GURPREET SINGH

Senior Workforce Management Leader | AI & Automation Strategist

gurpreetsinghwfm@gmail.com • +91-8377001181 • linkedin.com/in/gurpreetgarry • wfmclubs.com • Amritsar, India

PROFESSIONAL SUMMARY

Accomplished Workforce Management leader with 15+ years of progressive experience across global BPO, FinTech, and outsourcing organizations. Expert in AI-driven forecasting, multi-geography capacity planning, SLA governance, and real-time operations management — with a consolidated portfolio spanning 75+ banking clients and 500+ FTEs. Proven ability to translate complex workforce challenges into data-driven solutions using Python, machine learning, and Power BI. Currently spearheading FIS's enterprise AI automation initiative, modernizing legacy WFM processes for one of the world's largest FinTech firms ($14.5B revenue). Seeking executive-level opportunities to leverage strategic skills and drive operational excellence.

CORE COMPETENCIES

AI-Driven Forecasting & Scheduling	**Strategic Workforce Planning**	**Capacity & Budget Planning**	**People & Vendor Management**
SLA Performance Management	**Python & ML Model Development**	**Power BI Dashboard Design**	**Client & Stakeholder Engagement**
Cost Control & Profitability	**Process Optimization**	**Real-Time Operations Management**	**AI Automation & Innovation**

AI TOOLS & INNOVATIONS

Advanced AI Forecasting Tool — Python-based forecasting engine combining ARIMA, SARIMA, XGBoost, LightGBM, Random Forest, VAR, Exponential Smoothing, Gradient Boosting, and a proprietary Hybrid ARIMA+XGBoost model for superior contact center forecast accuracy.

Live app: forecastingtool1-2.streamlit.app | Demo: youtube.com/@wfmclubs

Advanced AI Scheduling Tool — Automated shift scheduling system that generates fully optimized agent schedules in seconds from uploaded forecast data, eliminating hours of manual planning effort.

PROFESSIONAL EXPERIENCE

Fidelity Information Services (FIS) — Nov 2024 – Present

Manager — Workforce Management

Global FinTech leader | $14.5B annual revenue | 50,000+ employees | 130+ countries

- Led FIS's AI initiative focused on modernizing and streamlining legacy operational processes, with the goal of improving efficiency, reducing manual effort, and enhancing decision-making through intelligent automation.
- Managed the performance of three external vendors through structured daily diligence reviews, while delivering both short-term and long-term forecasts to ensure strategic alignment and sustained operational efficiency.
- Oversaw end-to-end forecasting operations, including long-term budget planning, short-term demand forecasting, and SLA performance management for a consolidated leverage pool serving 75 distinct banking clients.
- Developed long-term budget plans and ensured forecast accuracy by aligning financial projections with strategic business objectives and evolving client requirements.

- Conducted regular performance review meetings with vendors and internal stakeholders, providing actionable recommendations to drive continuous improvement and ensure alignment with business objectives.
- Actively participated in Client, Ops, and Command Center calls, adeptly negotiating volume and staffing challenges, addressing WFM intricacies, and devising strategies to optimize workforce efficiency.
- Designed and implemented multiple Power BI dashboards to deliver detailed, data-driven insights for upper management, enabling strategic decision-making and performance monitoring across key business functions.
- Conducted ongoing analysis of shift availability, staffing requirements, and time-off allocations to optimize workforce planning and operational efficiency across the banking portfolio.
- Collaborated with the Sales team to develop simulations and tailored workforce solutions for onboarding new banking clients, supporting strategic growth and client acquisition initiatives.
- Managed client-initiated change requests and delivered detailed staffing analyses to support both strategic and operational needs across the banking client portfolio.
- Utilized Python and machine learning algorithms to develop accurate forecasting models, ensuring alignment with client-specific objectives and overarching strategic goals.
- Established standardized WFM reporting frameworks and governance protocols, ensuring consistent and timely delivery of performance insights across all 75 banking client accounts.
- Identified emerging workforce trends and capacity risks proactively, enabling leadership to make forward-looking decisions and mitigate potential SLA breaches before they materialized.
- Mentored junior WFM analysts on analytical techniques and forecasting methodologies, fostering a culture of continuous learning and data-driven excellence within the team.

TaskUs India Service Private Limited Aug 2023 – Nov 2024

Manager — Workforce Management

Global BPO | Restaurant chain operations — Japan (6 LOBs) & Malaysia (7 LOBs)

- Supervised restaurant chain business operations across Japan (6 Lines of Business) and Malaysia (7 Lines of Business), including phone, chat, email, and back-office modalities, orchestrating seamless communication channels to ensure efficient customer engagement and operational excellence.
- Actively participated in Client, Ops, and Command Center calls, adeptly negotiating volume and staffing challenges, addressing WFM intricacies, and devising targeted strategies to optimize workforce efficiency.
- Conducted thorough analyses and provided recommendations for seating arrangements and hiring needs across all programs, ensuring optimal resource allocation and workspace utilization.
- Evaluated operational processes, identified training requirements, and effectively communicated findings to the management team to drive team capability and performance improvements.
- Regularly reviewed company reporting under the guidance of senior leadership to ensure dashboard relevance, accuracy, and value addition to decision-making processes.
- Directly engaged with clients and business stakeholders to comprehend evolving business requirements and delivered tailored workforce management solutions aligned with operational goals.
- Collaborated with Client Services to formulate actionable plans and allocate resources effectively to meet specific client needs and contractual obligations.
- Identified call volume trends and averages on a monthly and quarterly/seasonal basis to anticipate staffing demands and proactively address capacity risks.
- Conducted root-cause analyses to quantify the reasons for forecast variance and proposed corrective changes to enhance forecast accuracy and overall workforce effectiveness.
- Provided ongoing analysis of available shift offerings, staffing requirements, and time-off allocations to ensure optimal utilization of workforce resources.
- Monitored call volume trends and averages on a monthly and quarterly/seasonal basis within the Workforce Management framework to maintain consistent service delivery standards.
- Projected annual leave requirements for each account group and team, including annual leave bidding and scheduling, managing leave schedules effectively to optimize request handling while minimizing the impact on call servicing.
- Developed and maintained region-specific WFM operational reports tailored for the Japan and Malaysia markets, ensuring culturally relevant and stakeholder-appropriate data presentation for both clients and internal leadership.

- Implemented cross-modality shrinkage tracking mechanisms across phone, chat, email, and back-office channels, improving occupancy optimization by identifying and addressing staffing gaps in real time.
- Liaised with HR and Training departments to align new-hire onboarding timelines with anticipated volume peaks, reducing ramp-up-related SLA risk and ensuring adequate staffing readiness ahead of high-demand periods.

Capgemini India Service Private Limited

Jun 2022 – Aug 2023

Manager — Workforce Management

Global IT & BPO leader | Leisure Cruise Line client (Florida, USA) — 8 Lines of Business

- Managed client operations for a Leisure Cruise Line based in Florida, America, encompassing a diverse portfolio of eight Lines of Business with oversight of customer support through phone, chat, email, and back-office channels.
- Led a team comprising two Real-Time Analysts and one Planner, providing dedicated WFM support and strategic guidance to the client from operations in India.
- Engaged directly with clients and business stakeholders to deeply understand evolving business requirements and delivered tailored workforce solutions that aligned with operational and contractual objectives.
- Provided ongoing analysis of available shift offerings, staffing requirements, and time-off allocations to ensure optimal utilization of workforce resources and sustained SLA compliance.
- Conducted meticulous assessments of weekly and monthly process performance, providing insightful analyses to operations to facilitate ongoing enhancements and foster a culture of continuous improvement.
- Analyzed call volume trends and averages on a monthly and quarterly/seasonal basis, proactively anticipating staffing requirements and ensuring operational seamlessness through early identification of demand patterns.
- Served as the primary point of contact for all scheduling-related issues and escalations, demonstrating a proactive, solutions-oriented approach to navigating challenges and ensuring swift and effective resolutions.
- Initiated proactive measures in team restructuring, staffing adjustments, and implementation of targeted training programs to drive alignment with capacity requirements and operational goals.
- Designed seasonal staffing models tailored to the cruise industry's peak travel periods, including summer holidays and festive seasons, ensuring SLA adherence and optimal agent utilization during high-demand windows.
- Collaborated with the client's Florida-based leadership team to develop customized scheduling frameworks aligned with US labor norms, client contractual obligations, and multi-time-zone operational requirements.
- Generated detailed variance reports comparing forecasted versus actual contact volumes, presenting findings to both internal operations and client stakeholders to drive data-driven corrective actions and continuous forecast refinement.

Concentrix India

Mar 2021 – Jun 2022

Deputy Manager — Workforce Management

Fortune 500 BPO | 24+ global processes across Manila, China, Colombia & USA

- Utilized advanced analytical tools and extensive industry expertise to extract detailed insights from workforce data, driving meaningful management discussions and supporting well-informed operational decision-making.
- Managed the complexities of scheduling, forecasting, budget planning, and capacity planning for over 24 processes across global locations including Manila, China, Colombia, and the USA, overseeing a team of 30 comprising two Team Leaders and 28 Executives.
- Actively participated in key Client, Ops, and Command Center calls, effectively negotiating volume and staffing challenges, addressing WFM intricacies, and developing targeted strategies to enhance workforce efficiency.
- Performed detailed analyses to optimize seating arrangements and hiring requirements across all programs, ensuring an efficient and well-aligned workforce capable of meeting dynamic business demands.
- Assessed operational processes, identified training needs, and effectively communicated insights to management to improve team skills, competency levels, and overall performance.
- Regularly reviewed company reporting in close collaboration with senior leadership, ensuring dashboards remained relevant, accurate, and provided valuable workforce management insights for strategic planning.
- Engaged with clients and business stakeholders to understand their evolving business needs and delivered tailored workforce solutions that aligned with organizational and client-specific objectives.
- Collaborated with Client Services to develop comprehensive action plans and allocate resources accurately, aligning workforce strategies with client-specific requirements to enhance overall service delivery.

- Identified call volume trends and averages on a monthly and quarterly basis to proactively anticipate staffing needs and ensure smooth, uninterrupted operations.
- Conducted root-cause analysis to identify the underlying reasons for forecast variances, recommending strategic adjustments to improve forecast accuracy and overall operational efficiency.
- Continuously analyzed shift offerings, staffing requirements, and time-off allocations to optimize resource utilization and maintain optimal workforce balance.
- Led and managed the scheduling team with a strong focus on quality assurance, accountability, and end-to-end ownership of all deliverables.
- Projected annual leave requirements for each account group and team, managing annual leave bidding and scheduling to optimize request handling and minimize adverse impacts on service levels.
- Coordinated multi-time-zone scheduling across Manila, China, Colombia, and USA locations, ensuring seamless 24/7 operational coverage without resource conflicts or SLA gaps.
- Developed and maintained a centralized capacity tracking model that provided real-time visibility into headcount utilization across all 24+ processes, enabling proactive resource rebalancing.
- Drove measurable improvements in schedule adherence metrics by implementing structured real-time monitoring protocols and escalation frameworks within the 30-member WFM team.

IGT Solutions India Private Limited

Jul 2019 – Mar 2021

Assistant Manager — Workforce Management

100% travel-industry BPO | Serving top-5 Airlines, Travel Companies & Hospitality brands globally

- Employed advanced analytical tools and extensive industry expertise to extract nuanced insights from workforce data, fostering meaningful discussions and facilitating informed decision-making at all levels of the organization.
- Steered the complexities of scheduling, forecasting, budget planning, and capacity planning across a diverse portfolio of over 24 processes spanning global locations including Manila, China, Colombia, and the USA, overseeing a dedicated team of 30 comprising two Team Leaders and 28 Executives.
- Actively participated in crucial Client, Ops, and Command Center calls, adeptly negotiating volume and staffing challenges, addressing WFM intricacies, and formulating targeted strategies to optimize workforce efficiency.
- Conducted meticulous analyses to fine-tune seating arrangements and hiring needs across all programs, ensuring a highly efficient and well-aligned workforce calibrated to business requirements.
- Evaluated operational processes, keenly identified training needs, and effectively communicated findings to the management team to enhance team competencies and performance standards.
- Consistently reviewed company reporting under the guidance of senior leadership, ensuring dashboards remained current, relevant, and contributed measurable value to workforce management insights.
- Engaged directly with clients and business stakeholders to deeply understand evolving business requirements and delivered tailored workforce solutions aligned with client expectations.
- Collaborated seamlessly with Client Services to formulate action plans and allocate resources with precision, aligning WFM strategies with specific client needs to optimize service delivery.
- Identified call volume trends and averages on a monthly and quarterly/seasonal basis to anticipate staffing requirements and ensure seamless, uninterrupted operations.
- Conducted root-cause analysis to quantify the reasons for forecast variance, proposing strategic changes to enhance forecast accuracy and improve overall operational effectiveness.
- Provided ongoing analysis of available shift offerings, staffing requirements, and time-off allocations to ensure optimal utilization of all workforce resources.
- Led and managed the scheduling team with a sharp focus on quality assurance, accountability, and full ownership of all deliverables.
- Projected annual leave requirements for each account group and team, skillfully managing annual leave bidding and scheduling to optimize request handling and minimize adverse impacts on call servicing.
- Supported WFM operations for top-tier airline and travel industry clients, including IROPS management and reservations processes, applying workforce expertise to high-stakes, time-sensitive contact center environments.
- Developed travel-industry-specific seasonality and volatility models to account for peak holiday travel periods, school breaks, and airline disruptions, significantly improving forecast accuracy during unpredictable demand cycles.

- Partnered with the technology and operations teams to enhance WFM tool capabilities, streamlining data extraction and reporting processes and reducing manual effort across the global operation.

Convergys India Services Private Limited

Feb 2015 – Jul 2019

Assistant Manager — Workforce Management

Global CX leader (~76,000 employees) | 4 accounts across Dublin & Ireland | 500+ teammates

- Developed and maintained comprehensive forecast and capacity plans, ensuring optimal staffing levels during both peak and lean periods to sustain consistent service level delivery.
- Assumed full accountability for the oversight of four accounts strategically positioned across two offshore locations in Dublin and Ireland, managing a workforce exceeding 500 teammates and fostering a collaborative environment while implementing strategic initiatives to enhance operational efficiency and client satisfaction.
- Conducted detailed analyses, provided strategic recommendations, and oversaw the allocation of seating and hiring needs across all programs to ensure an efficient and right-sized workforce.
- Established and maintained comprehensive documentation outlining workforce management policies, processes, procedures, and associated staff responsibilities to ensure operational consistency and compliance.
- Collaborated closely with business leaders to effectively manage staffing levels in alignment with organizational objectives, contractual SLAs, and evolving client demands.
- Spearheaded the development of key People metrics, including employee utilization, productivity, shrinkage, and schedule adherence, to drive workforce effectiveness and informed performance management.
- Conducted thorough reviews of weekly and monthly process performance, offering valuable insights to operations leadership for continuous improvement and proactive issue resolution.
- Managed complex multi-account scheduling across Dublin and Ireland, ensuring equitable workload distribution, adherence to local labor regulations, and SLA compliance for a 500+ teammate workforce spread across four simultaneous client accounts.
- Partnered with Training and HR teams to design structured onboarding schedules for new hires, minimizing productivity ramp-up time and reducing time-to-competency for new associates joining the operation.
- Played a key role in contract renewal discussions by providing detailed staffing cost models and forward-looking capacity projections, directly contributing to client retention efforts and account growth initiatives.

Kochar InfoTech India Private Limited

Nov 2013 – Feb 2015

Assistant Manager — Workforce Management

Wireless data support BPO | 5,000+ employees | Trusted partner to major Telecom operators & OEMs

- Formulated a comprehensive strategy and vision for Call Center Workforce Management operations, establishing clear objectives and detailed execution plans, and overseeing the full implementation and delivery of these initiatives.
- Provided strategic and tactical leadership to the WFM staff, ensuring consistent adherence to daily responsibilities and fostering a culture of excellence, while facilitating proper staffing levels and training programs to accomplish departmental goals and objectives.
- Attained service level goals for both phone and back-office functions through meticulous forecasting, precise scheduling, and proactive real-time management.
- Developed sophisticated staffing models and high-quality forecasts, collaborating and coordinating with contact center leadership to maintain optimal staffing levels at all times.
- Acted as the primary point of contact for all scheduling-related issues and escalations, consistently demonstrating a proactive resolution mindset and a solutions-oriented approach to workforce challenges.
- Identified and proactively drove necessary team restructuring, staffing adjustments, and targeted training initiatives to support evolving capacity requirements and operational objectives.
- Led the development of supply-demand matching and mitigation plans to address capacity gaps, conducting what-if scenario analyses with a Service and P&L mindset to inform strategic decision-making.
- Identified opportunities and risks within the workforce management landscape, conducting deep analytical reviews and collaborating with internal and external teams to implement effective and sustainable solutions.

- Conducted comprehensive evaluations of current staffing levels and anticipated future needs based on efficiency analysis, providing well-founded recommendations for headcount changes and outsourcing allocations to optimize workforce efficiency.
- Designed shift patterns and scheduling templates tailored to the telecom sector's 24/7 support requirements, ensuring continuous queue coverage across all technical support and customer service channels without compromising agent welfare.
- Analyzed agent attrition trends in collaboration with HR to develop proactive workforce retention strategies, reducing unplanned shrinkage and stabilizing staffing levels throughout the year.
- Collaborated with Quality and Operations teams to correlate schedule adherence data with CSAT scores, identifying scheduling-related drivers of service quality degradation and implementing targeted corrective interventions.

Teleperformance India Services Private Limited

Jun 2011 – Nov 2013

Assistant Manager — Workforce Management

Global CX leader | India operations since 2001 | US & Indian domestic market

- Spearheaded the formulation of comprehensive People metrics, encompassing key parameters such as employee utilization, productivity, shrinkage, and schedule adherence to drive workforce performance excellence.
- Conducted thorough reviews of weekly and monthly process performance, furnishing operational insights to leadership to enhance overall efficiency and support data-driven decision-making.
- Undertook extensive research on workforce management best practices and formulated tailored recommendations to optimize demand forecasting, bolster capacity planning, and enhance employee utilization across combined operations.
- Proactively identified and led initiatives for team restructuring, staffing adjustments, and targeted training programs to align workforce capacity with evolving business requirements.
- Developed and implemented strategies for supply-demand alignment, along with mitigation plans to address capacity gaps, leveraging what-if scenario analysis guided by a Service and P&L mindset.
- Identified and analyzed opportunities and risks within the workforce landscape, collaborating with internal and external stakeholders to implement effective and lasting solutions.
- Conducted a comprehensive evaluation of current staffing levels and anticipated future needs through efficiency analysis, providing well-founded recommendations for headcount adjustments and potential outsourcing allocations to optimize resource deployment.
- Managed WFM operations for US-facing accounts, ensuring alignment with North American client expectations for service level delivery, response time adherence, and staffing cost efficiency.
- Built agent scheduling models incorporating multi-skill routing capabilities, enabling the contact center to handle blended voice and non-voice workloads more efficiently and flexibly.
- Developed interval-level intraday performance reports to give Operations real-time visibility into staffing health, enabling supervisors to make proactive intraday adjustments during peak contact volume periods.

Kochar InfoTech India Private Limited

Mar 2010 – May 2011

Senior Executive — Workforce Management

- Conducted a comprehensive analysis of staffing levels and strategically adjusted workforce composition to optimize operational efficiency and consistently meet service level requirements.
- Demonstrated strong business acumen and a nuanced understanding of operational dynamics, enabling an accurate and discerning assessment of leadership's evolving business needs and workforce priorities.
- Identified and proposed staffing strategies aligned with service performance objectives, including considerations for permanent hires, contractors, outsourcing arrangements, and maintaining appropriate Part-Time to Full-Time ratios.
- Employed analytical methods, mathematical models, and specialized workforce tools to assess the risk-benefit equation and simulate various what-if scenarios, facilitating data-driven decision-making.
- Actively contributed to the formulation of contact center workforce strategy, leveraging WFM expertise to enhance operational effectiveness and drive continuous improvement.
- Rigorously validated key assumptions and analytical outputs against the current business environment and emerging market trends, ensuring strategic alignment with organizational goals.

- Supported senior WFM managers in developing interval-level forecasts and translating them into daily scheduling requirements, gaining hands-on expertise across the full end-to-end WFM planning cycle.
- Generated intraday performance reports and provided real-time staffing recommendations to team leaders, contributing to improved schedule adherence and better service level outcomes during critical periods.
- Participated in regular calibration sessions with Operations to refine scheduling assumptions and align workforce planning models with actual floor conditions and emerging call pattern behaviors.

TECHNICAL SKILLS

Programming Languages	Python, C, C++, VBA, SQL, PostgreSQL
Data & Analytics	Power BI, Advanced Excel (Pivot Tables, VLOOKUP, VBA Macros), MS Access
AI / ML Frameworks	ARIMA, SARIMA, XGBoost, LightGBM, Random Forest, Gradient Boosting, VAR, Exponential Smoothing, Hybrid ARIMA+XGBoost
WFM Platforms	IEX TotalView 4.5, TBMS (Total Billing Management Solution), CMSS (Customer Management Support System), Oxygen, FoxPro, Genesis
Productivity & Automation	MS Office Suite (Excel, Word, PowerPoint, Access), AutoHotkey, iMacro, VBA Scripting

EDUCATION

Bachelor of Computer Applications (BCA) Punjab Technical University, Jalandhar

Senior Secondary (10+2) • Secondary (10th) — P.S.E.B Board

ACHIEVEMENTS & RECOGNITION

FIS WFM Leadership R&R Award — April 2025

Awarded the monthly Recognition & Reward by the FIS WFM Leadership Team for outstanding contributions to workforce efficiency, AI transformation, and operational excellence. View Certificate ↗
